SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine remains slow and uneven. Despite economic resilience earlier this year, with a reopening rebound and progress in reducing inflation from last year's peaks, it is too soon to take comfort. Economic activity still falls short of its pre pandemic path, especially in emerging market and developing economies, and there are widening divergences among regions. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, the war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical in nature, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events.

Global growth is forecast to slow from 3.5 percent in 2022 to 3.0 percent in 2023 and 2.9 percent in 2024. The projections remain below the historical (2000–19) average of 3.8 percent, and the forecast for 2024 is down by 0.1 percentage point from the July 2023 Update to the World Economic Outlook. For advanced economies, the expected slowdown is from 2.6

percent in 2022 to 1.5 percent in 2023 and 1.4 percent in 2024, amid stronger-than-expected US momentum but weaker-than-expected growth in the euro area. Emerging market and developing economies are projected to have growth modestly decline, from 4.1 percent in 2022 to 4.0 percent in both 2023 and 2024, with a downward revision of 0.1 percentage point in 2024, reflecting the property sector crisis in China. Forecasts for global growth over the medium term, at 3.1 percent, are at their lowest in decades, and prospects for countries to catch up to higher living standards are weak. Global inflation is forecast to decline steadily, from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024. But the forecasts for 2023 and 2024 are revised up by 0.1 percentage point and 0.6 percentage point, respectively, and inflation is not expected to return to target until 2025 in most cases.

INDIAN ECONOMY:

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localised lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimising the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

State of Gujarat & Maharashtra contributes 94.75% and 5.25% of our total domestic revenue for the period ended on September 30, 2023. If the state's economies becomes unstable or uncertain, if the financial market conditions worsen, if there are changes made to the laws that apply to our industry, or if we are subject to any restrictive measures. Furthermore, our operations and financial situation might be negatively impacted if the final customers in these regions decide to significantly cut back on or delay their spending.

Some of these approvals are granted for a limited duration. While we are required to obtain a number of approvals for legally conducting our business operations and we shall submit the applications for renewal of such approvals, as and when required, during the course of our business operations, we cannot assure you that we will be able to obtain approvals in respect of such applications, or any application made by us in the future. If we fail to obtain such registrations and licenses or renewals, in a timely manner, we may not then be able to carry on certain operations of our business, which may have an adverse effect on our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

The composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

Any significant malfunction or breakdown or occurrence of any accident involving any of our machinery, our equipment, our laboratories, our automation systems, our IT systems or any other part of our manufacturing operations or systems (together, our “Manufacturing Assets”) may entail significant repair and maintenance costs, cause delays, suspension or full or partial shutdown of our operations. As of September 30, 2023 our Company had total indebtedness in the form of short term and long-term borrowings of ₹ 4261.10 on standalone restated basis. Our indebtedness could have several important consequences, including but not limited to the following:

- a portion of our cash flows may be used towards repayment of our existing debt, which will reduce the availability of our cash flows to fund working capital, capital expenditures and other general corporate requirements;
- our ability to obtain additional financing in the future at reasonable terms may be restricted;
- fluctuations in market interest rates may affect the cost of our borrowings, as some of our indebtedness is at variable interest rates;

Many of our financing agreements also include various conditions and covenants that require us to obtain consent of the lenders prior to carrying out certain activities or entering into certain transactions. Certain covenants in these agreements

require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. In the event of default or the breach of certain covenants, our lender(s) have the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. In the event we breach any financial or other covenants contained in certain of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows.

Further, as on the date of the Draft Prospectus, we have not received No Objection certificate from lender(s). We cannot assure you that such lender(s) will grant us consent and No- Objection certificate for this public Issue. Non-receipt of such consent and No-Objection certificate could lead to non-compliance of the terms of loan agreements entered into by our Company with the lender(s). Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. Our working capital requirement for the period ended September 30, 2023 is ₹ 1543.42 Lakhs. The Net Working capital requirements for the FY 2023-24 is estimated to be ₹ 3,063.69 Lakhs and ₹ 4,299.64 Lakhs for FY 2024-25. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations.

Further, we have high Debtors which may result in a high risk in case of non-payment by these Debtors. In the event we are not able to recover our dues from our Debtors, we may not be able to maintain our Sales level and thus adversely affecting our financial health.

17. In our restated financials as at September 30, 2023, we have a contingent liability related to export commitments. Failure to meet these commitments under the Export Promotion Capital Goods (EPCG) scheme may result in the imposition of penalties.

Under various licenses, we have imported specific capital goods at concessional duty as part of the EPCG scheme, entitling us to duty concession amounting to ₹ 6,00,10,785.40/- on the purchase of plant and machinery. Consequently, we are obligated to export products worth US \$ 45,72,848.27 within a six-year period (comprising two block years: 1st to 4th year (1st Block) - 50%, and 5th to 6th year (2nd Block) - 50%) from the respective license/authorization dates: September 09, 2022 (license/authorization number 0831005951), October 03, 2022 (license/authorization number 0831006149), and October 04, 2022 (license/authorization number 0831006197).

We cannot guarantee our ability to sustain future exports and fulfil the complete export obligation within the stipulated period. Failure to meet the aforementioned commitment may result in retrospective levy of import duty on items previously imported at concessional duty. Furthermore, the relevant authorities have the discretion to impose penalties and/or interest for any defaults on a case-by-case basis. Non-compliance with statutory obligations may lead to penalties, potentially causing a material adverse effect on our business, financial condition, and results of operations.

18. We have not yet applied for registration of our name and logo and we do not own the "corporate logo" legally as on date.

We have not yet applied for the registration of our name and logo  under the provisions of the Trademarks Act, 1999, and as a result, we do not legally own the "corporate logo" used in our communications and other operations to date. Consequently, we do not benefit from the statutory protections afforded to a registered trademark or logo at present. This situation leaves us vulnerable to potential challenges alleging the infringement of third-party intellectual property rights. The absence of registered protection for our intellectual property raises concerns about our ability to safeguard it adequately. There is no guarantee that we will be able to secure the registration of our logo in the future, nor can we be certain that third parties will refrain from infringing upon our intellectual property, potentially causing harm to our business prospects, reputation, and goodwill. Furthermore, we cannot provide assurance that any future application for the registration of our logo by our company will be granted by the relevant authorities in a timely manner, if at all. Our current efforts to protect our intellectual property may be insufficient, posing a risk of diminishing our business value and adversely impacting our operations. In the event of disputes regarding the validity of such claims and the extent of the proprietary rights of others, we may need to resort to litigation. However, such legal proceedings could be protracted and costly, with no guaranteed outcome. Additionally, there is a possibility that we may not be able to detect unauthorized use of our intellectual property or take prompt and effective measures to enforce or protect it.

19. Changes in technology may render our current technologies obsolete or require us to make substantial investments.

To remain competitive and efficient, modernization and technology upgradation are crucial for reducing costs and increasing output. Our business heavily relies on technology and machinery to deliver quality services. However, there is a risk of our technology and machinery becoming obsolete over time or not being upgraded timely, which can adversely impact our operations and financial condition, leading to a loss of competitive edge in the market. While we believe that we have implemented updated technology, we understand the importance of continuous improvement. We are committed to staying abreast of the latest technological standards and trends to enhance our capabilities. In the event of a new technology emerging in our industry, we may be required to invest in adopting that technology or upgrading our existing machinery and equipment to remain competitive.

The costs associated with upgrading technology and modernizing machinery are significant, and they can have a substantial impact on our finances and operations. These investments may lead to higher capital expenditures and can temporarily affect our profitability and cash flow. We must carefully assess the potential benefits and returns on such investments to ensure they align with our long-term growth objectives.

Our ability to successfully implement technology upgrades and modernization efforts depends on various factors, including availability of skilled technicians, compatibility of new technology with existing systems, and adequate financial resources. Delays or challenges in adopting new technology can hinder our operational efficiency and competitiveness in the market.

20. *We are dependent on our Promoters, our senior management and other key personnel, and the loss of, or our inability to attract or retain, such persons could affect our business, results of operations, financial condition and cash flows.*

Our performance depends largely on the efforts and abilities of our promoters, senior management and other key personnel. They have gained experience in this line of business and have over the years built relations with our customers and other persons who are connected with us and have been actively involved in the day to day operations and management, further we believe that the inputs and experience of our senior management, in particular, and other key personnel are valuable for project development and procurement activities, and our overall business operations and the strategic directions taken by our Company. For details in relation to the experience of our key management personnel, see “***Our Management***” on page 131 of this Draft Prospectus. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an effect on our business, results of operations, financial condition and cash flows.

21. *Our Business requires deployment of labour and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.*

Our business operations require deployment and our ability to retain labour. In case such labour workforce is unavailable, or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. Additionally, there have been amendments in the labour and Employment related laws, which may have a direct impact on our employee costs and consequently, on our margins. Further, latest amendments in labour laws in India may be lead to increasing cost of compliance, wages, social security, Occupational Safety, Health and Working Conditions. We cannot assure you that we will continue to comply with all these labour related laws and that as we continue to grow our business in the future, our labour and employee costs coupled with operating compliances and expenses will not significantly increase. Our employees are not unionized currently. However, there is no assurance that our employees will not seek unionization in the future. In the event that employees at our manufacturing facility take any steps to unionise, it may become difficult for us to maintain flexible labour policies and may increase our costs and adversely affect our business.

Any strikes or lock-outs, work stoppages, slowdowns, shut downs, supply interruptions or costs or other factors beyond our control, may disrupt our operations and could negatively impact our financial performance or financial condition. Additionally, our inability to recruit employees, in particular skilled employees and retain our current workforce could have a material adverse effect on our business, financial condition and profitability. There can be no assurance that we will not experience slowdowns or shutdowns in the manner described above, or in any other manner, in the future, for reasons which are beyond our control. Any slowdown or shutdown will adversely impact our results of operations, market share and financial condition.

22. *Our success depends on our ability to attract and retain our key management personnel. If we are unable to do so, it would adversely affect our business and results of operations.*

Our future success substantially depends on the continued service and performance of the members of our senior management team and other key personnel in our business for management, running of our daily operations, and the planning and execution of our business strategy. There is intense competition for experienced senior management and other key personnel with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired.

Additionally, we may not have in place the necessary systems and processes to develop key personnel internally. Our Company does not maintain any director’s and officer’s insurance policy or any keyman insurance policy. The loss of key members of our senior management or other key team members, particularly to competitors, could have an adverse effect on our business and results of operations. Our performance also depends on our ability to attract and train highly skilled personnel. If we are unable to do so, it would materially and adversely affect our business, prospects and results of operations.

23. *Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.*

Our business, assets at our manufacturing facility and vehicles could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if an insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

24. In addition to regular remuneration, other benefits and expense reimbursement our Promoters, Directors, key managerial personnel or senior management hold a vested interest in our Company; to the extent of their shareholding and associated dividend entitlements. They also have a stake in transactions involving our company, whether with themselves individually or with our group companies/entities. Our Company in future may enter in related party transactions subject to necessary compliances.

Our Promoters, Directors, key managerial personnel or senior management are interested in our Company to the extent of their shareholding and associated dividend entitlements thereon in our Company, in addition to regular remuneration or benefits and expenses reimbursement. Our Promoters, Directors, key managerial personnel or senior management are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity. All transactions with related parties entered into by the company in past were at arm's length basis, in compliance with applicable provisions of Companies Act, 2013 and other applicable provisions.

Additionally, our Company may enter in related party transactions in future subject to necessary compliances in accordance with relevant acts, rules and regulations. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last three years and stub period, please refer to the "Annexure 29 – Related Party Transaction" under the Chapter titled "Restated Financial Information" beginning on Page No. 148 of this Draft Prospectus.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

25. All of our revenue from operations are generated from India. Any adverse development affecting our operations in India could have an adverse impact on our business, financial condition and results of operations.

We derive 100% of our revenue from operations from India. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region which may adversely affect our business prospects, financial condition and result of operations.

The concentration of our business is manufacturing of open ended yarn. subjects us to various risks, including but not limited to:

- Regional slowdown in Industrial activities;
- vulnerability to change of policies, laws and regulations or the political and economic environment;
- constraint on our ability to diversify across states; and
- perception by our potential clients that we are a regional company, which may hamper us from competing or securing orders for large and complex projects at the national level.

Further, factors such as competition, culture, regulatory regimes, business practices and customs, behavior and preferences in the Countries and State where we may plan to expand our operations may differ from India, and our experience in the India may not be applicable to such other Countries. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national player, but also local players who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors/service provider.

We may not be able to leverage our experience in these regions to expand our operations in other parts of India and outside India.

26. We may face foreign exchange risks that could adversely affect our results of operations and cash flows.

Our company could export its products in international market. We may expose to foreign currency fluctuation risk. Although, we closely follow our exposure to foreign currencies. We do not hedge our exposure to foreign currency as a result, our operations, cash flows and financial performance could be adversely affected in case these currencies fluctuate significantly. We may from time to time be required to make provisions for foreign exchange differences in accordance with accounting standards. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations and cash flows. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations and cash flows. Certain markets in which we sell our products may be subject to foreign exchange repatriation and exchange control risks, which may result in either delayed recovery or even non-realization of revenue.

27. We could be adversely affected due to misconduct or errors of our employees that are difficult to detect and any such incidents could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and damage our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

28. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

Our company faces potential risks related to incidents of theft or damage to inventory. While we have not encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on the results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc. including third party risk arising due to causes attributable to us.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company.

29. Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Moreover, we might not sustain historical dividend levels moving forward.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “Dividend Policy” on page 147 of the Draft Prospectus. While we have paid dividends in the past, there can be no assurance as to whether we will pay dividends in the future and, if so, the level of such future dividends.

30. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

31. *After the completion of the Issue, our Promoters and members of Promoter Group will continue to collectively hold substantial shareholding in our Company.*

Currently, our Promoters and members of Promoter Group own approximately 100% of our outstanding Equity Shares. Following the completion of the Issue, our Promoters and members of Promoter Group will continue to hold a large majority i.e. 69.84% of our post-Issue Equity Share capital which will allow them to exercise significant control over the outcome of the matters submitted to our shareholders for approval. For details of their shareholding pre- and post- Issue, see “Capital Structure” on page 50. This concentration of ownership may delay, defer or even prevent a change in control of our Company and may make some transactions more difficult without the support of these shareholders. In addition, these Shareholders have the ability to exercise influence over our business, and may cause us to take actions that are not in, or may conflict with, our or our other shareholder’s best interests, including matters relating to our management and policies and the election of our directors and senior management, the approval of lending and investment policies, revenue budgets, capital expenditure, dividend policy, strategic acquisitions and fund raising activities. The interests of our significant shareholders could conflict with our interests or the interests of our other shareholders. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

32. *Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds towards utilization for the working capital requirement and General Corporate Purposes of our Company. For further details of the proposed objects of the Issue, see Chapter titled as “*Objects of the Issue*” beginning on page 69. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

33. *Any future issuance of our Equity Shares may dilute prospective investors’ shareholding, and sales of our Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company’s Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company’s

Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

34. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "**Basis for Issue Price**" beginning on page 76 of the Draft Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

35. *The Objects of the Issue for which funds are being raised, are based on our management estimates and the same have not been appraised by any bank or financial institution or any independent agency. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titled as "Objects of the Issue".*

The fund requirement and deployment, as mentioned in the chapter titled as "**Objects of the Issue**" on page 69 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter titled "**Objects of the Issue**" on page 69 of this Draft Prospectus is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation under chapter titled "**Objects of the Issue**" will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control and will be subject applicable rules and regulations. The occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

36. *Industry information included in this Draft Prospectus has been derived from an industry sources. There can be no assurance that such third-party statistical, financial and other industry information is complete, reliable or accurate.*

This Draft Prospectus includes information on Industry in which we operate from various sources. For further details, please see chapter titled "**Industry Overview**" beginning on page 90. The data has been furnished by independent agency on their websites and has no relationship with our Company, its Promoters, Directors, or the Book Running Lead Manager as on the date of this Draft Prospectus. The data used in these sources may have been reclassified by us for the purposes of presentation and may also not be comparable. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. Accordingly, investors must rely on their independent examination of, and should not place undue reliance on, or base their investment decision solely on this information. The recipient should not construe any of the contents in this report as advice relating to business, financial, legal, taxation or investment matters and are advised to consult their own business, financial, legal, taxation, and other advisors concerning the transaction.

37. *In the event there is any delay in the completion of the Issue, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled "Objects of The Issue" on Page no. 69 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management 's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

38. *We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled "Objects of the Issue".*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled “Object for the Issue” beginning on page 69 of this Draft Prospectus.

39. Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

40. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

EXTERNAL RISK FACTORS:

1. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable.

2. Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of ₹ 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of

equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

3. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

We are dependent on domestic, regional and global economic and market conditions. The performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

4. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

5. *Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.*

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighboring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

6. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock prices.*

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation,

deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

7. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

8. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

9. *Instability in financial markets could materially and adversely affect the results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

10. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

11. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

12. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by center or state political instability or regional conflicts, a general

rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

13. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "Government and Other Statutory Approvals" on page 256 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned, and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see "Outstanding Litigation and Material Developments" on page 161. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India's Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 ("Finance Act"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax ("DDT"), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing in

or trading in Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty about the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

14. *The Equity Shares have never been publicly traded, and the Offer may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, there will be liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Offer. The market price of the Equity Shares after the Offer can be volatile as a result of several factors beyond our control, including volatility in the Indian and global securities markets, our results of operations, the performance of our competitors, developments in the Indian and global machine tools industry, changing perceptions in the market about investments in this sector in India, investor perceptions of our future performance, adverse media reports about us or our sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India's economic liberalisation and deregulation policies, and significant developments in India's fiscal regulations. In addition, the Stock Exchanges may experience significant price and volume fluctuations, which may have a material adverse effect on the market price of the Equity Shares. General or industry-specific market conditions or stock performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance may also affect the price of the Equity Shares. In particular, the stock market as a whole in the past has experienced extreme price and volume fluctuations that have affected the market price of many companies in ways that may have been unrelated to the companies' operating performances. For these reasons, investors should not rely on recent trends to predict future share prices, results of operations or cash flow and financial condition.

15. *The requirements of being a publicly listed company may strain our resources.*

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and, or, we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition.

Any further issuance of Equity Shares, or convertible securities or other equity-linked instruments by us may dilute your shareholding. We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

16. *The sale of Equity Shares by our Promoters in future may adversely affect the market price of the Equity Shares.*

After the completion of the Offer, our Promoters will still own a significant percentage of our issued Equity Shares. The sale of a large number of the Equity Shares by our Promoters could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur, could adversely affect the market

price of the Equity Shares. No assurance may be given that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

17. There is no guarantee that our Equity Shares will be listed on the relevant stock exchange in a timely manner or at all.

There is no guarantee that our Equity Shares will be listed on the relevant stock exchange in a timely manner or at all. In accordance with Indian law, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer. In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the relevant stock exchange within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

GLOBAL OUTLOOK

The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine remains slow and uneven. Despite economic resilience earlier this year, with a reopening rebound and progress in reducing inflation from last year's peaks, it is too soon to take comfort. Economic activity still falls short of its prepandemic path, especially in emerging market and developing economies, and there are widening divergences among regions. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, the war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical in nature, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events.

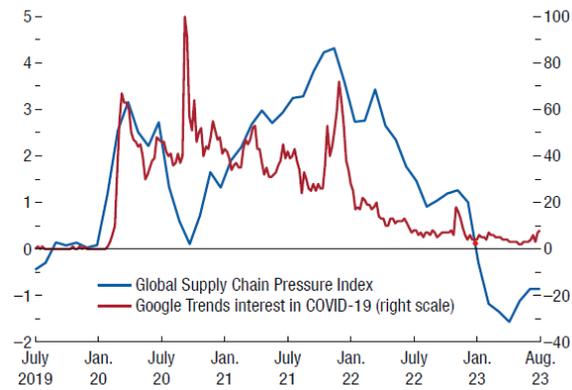

Global growth is forecast to slow from 3.5 percent in 2022 to 3.0 percent in 2023 and 2.9 percent in 2024. The projections remain below the historical (2000–19) average of 3.8 percent, and the forecast for 2024 is down by 0.1 percentage point from the July 2023 Update to the World Economic Outlook. For advanced economies, the expected slowdown is from 2.6 percent in 2022 to 1.5 percent in 2023 and 1.4 percent in 2024, amid stronger-than-expected US momentum but weaker-than-expected growth in the euro area. Emerging market and developing economies are projected to have growth modestly decline, from 4.1 percent in 2022 to 4.0 percent in both 2023 and 2024, with a downward revision of 0.1 percentage point in 2024, reflecting the property sector crisis in China. Forecasts for global growth over the medium term, at 3.1 percent, are at their lowest in decades, and prospects for countries to catch up to higher living standards are weak. Global inflation is forecast to decline steadily, from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024. But the forecasts for 2023 and 2024 are revised up by 0.1 percentage point and 0.6 percentage point, respectively, and inflation is not expected to return to target until 2025 in most cases.

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia's war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events.

Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of prepandemic (January 2020) projections, especially in emerging market and developing economies. The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its prepandemic path. The euro area has recovered, though less strongly with output still 2.2 percent below prepandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with prepandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below prepandemic projections.

Despite these persistent challenges, several headwinds to global growth subsided earlier this year. The World Health Organization announced in May that it no longer considered COVID-19 a global health emergency, and infections and hospitalizations appear to remain relatively limited, despite a recent uptick in some regions. Supply chains, which the pandemic disrupted, have largely normalized, with shipping costs and suppliers' delivery times back to prepandemic levels. And global financial conditions eased after Swiss and US authorities took strong action in March to contain turbulence in their banking sectors.

Amid these conditions, global GDP expanded by 3.4 percent in the second quarter of 2023 compared with a year earlier outperforming forecasts, including those in the April 2023 WEO. The resilience reflected strong consumption amid tight labor markets in the United States and robust activity in economies with large travel and tourism sectors, such as Italy, Mexico, and Spain. These developments offset a slowdown in more interest-rate-sensitive manufacturing sectors.

That said, there are signs the rebound is fading:

- Diminishing pandemic-era savings: The stock of savings built during the pandemic, which has so far supported consumers, is declining in advanced economies, especially the United States, as illustrated in below Figure. This implies fewer resources for households to draw on as they contend with a still-elevated cost of living and more restricted credit availability in the context of monetary tightening aimed at reducing inflation.

INDIAN ECONOMY

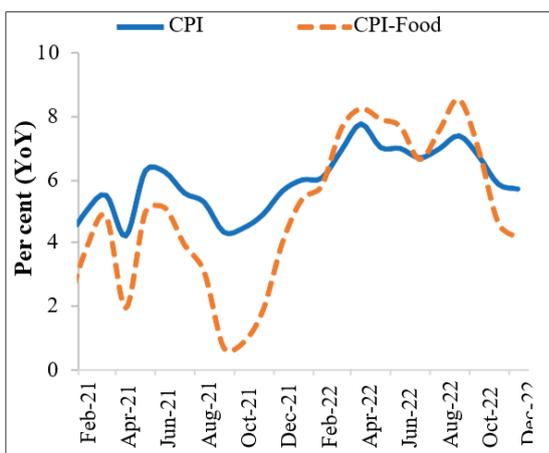

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localised lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimising the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

However, the conflict in Europe necessitated a revision in expectations for economic growth and inflation in FY23. The country's retail inflation had crept above the RBI's tolerance range in January 2022. It remained above the target range for ten months before returning to below the upper end of the target range of 6 per cent in November 2022. During those ten months, rising international commodity prices contributed to India's retail inflation as also local weather conditions like excessive heat and unseasonal rains, which kept food prices high. The government cut excise and customs duties and restricted exports to restrain inflation while the RBI, like other central banks, raised the repo rates and rolled back excess liquidity.

With monetary tightening, the US dollar has appreciated against several currencies, including the rupee. However, the rupee has been one of the better-performing currencies worldwide, but the modest depreciation it underwent may have added to the domestic inflationary pressures besides widening the CAD. Global commodity prices may have eased but are still higher compared to pre-conflict levels. They have further widened the CAD, already enlarged by India's growth momentum. For FY23, India has sufficient forex reserves to finance the CAD and intervene in the forex market to manage volatility in the Indian rupee.

For many countries around the world, including India, 2021 was a period of recovery for health and economies from the impact of the pandemic. For the advanced economies, in particular, the enormous fiscal stimulus earlier injected by their governments supported a strong demand revival. Growth in world trade subsequently followed, of which India was also a beneficiary. India's exports surged in FY22, and the momentum lasted up to the first half of FY23. Export growth was strong enough to increase India's share in the world market of merchandise exports. However, due to aggressive and synchronised monetary tightening, global economic growth has started to slow, and so has world trade. As per United Nations Conference on Trade and Development (UNCTAD) latest global trade update, global trade growth turned negative during the H2:2022, and geopolitical frictions, persisting inflationary pressures, and subdued demand are expected to suppress global trade further in 2023. This is likely to affect many countries, including India, with the prospects of sluggish exports continuing into FY24, compared to the promise shown at the beginning of the current year.

India's Economic Resilience and Growth Drivers

Monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent. Despite the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic. IMF estimates India to be one of the top two fast-growing significant economies in 2022. Despite strong global headwinds and tighter domestic monetary policy, if India is still expected to grow between 6.5 and 7.0 per cent, and that too without the advantage of a base effect, it is a reflection of India's underlying economic resilience; of its ability to recoup, renew and re-energise the growth drivers of the economy.

Figure I.17: India growth projections by various agencies for FY23

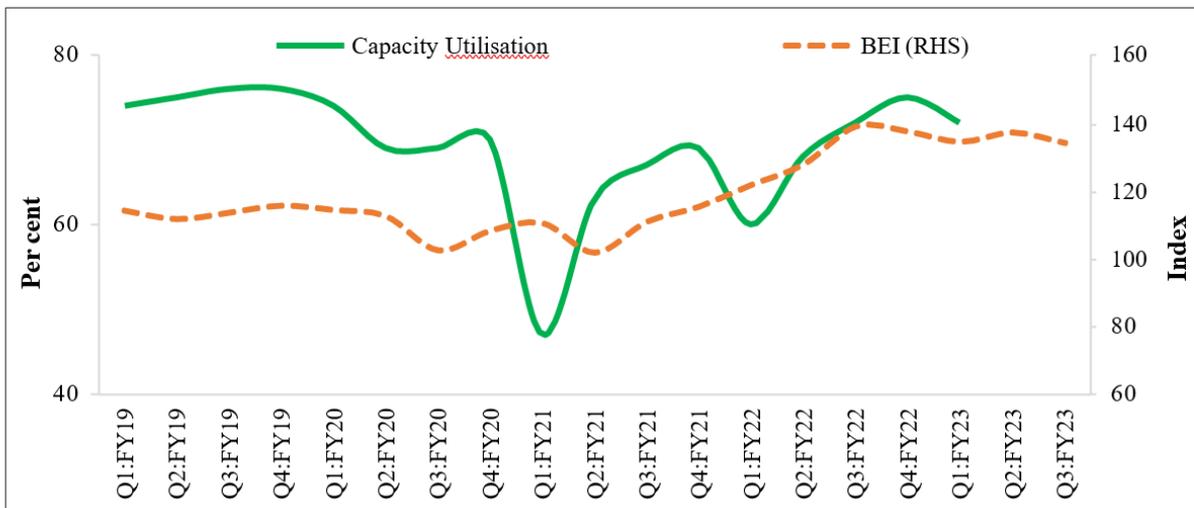

Source: Various Agencies

Note: ADB stands for Asian Development Bank, IMF is International Monetary Fund

India's economic resilience can be seen in the domestic stimulus to growth seamlessly replacing the external stimuli. The growth of exports may have moderated in the second half of FY23. However, their surge in FY22 and the first half of FY23 induced a shift in the gears of the production processes from mild acceleration to cruise mode. Manufacturing and investment activities consequently gained traction. By the time the growth of exports moderated, the rebound in domestic consumption had sufficiently matured to take forward the growth of India's economy. Private Consumption as a percentage of GDP stood at 58.4 per cent in Q2 of FY23, the highest among the second quarters of all the years since 2013-14, supported by a rebound in contact-intensive services such as trade, hotel and transport, which registered sequential growth of 16 per cent in real terms in Q2 of FY23 compared to the previous quarter.

Although domestic consumption rebounded in many economies, the rebound in India was impressive for its scale. It contributed to a rise in domestic capacity utilisation. Domestic private consumption remains buoyant in November 2022, as indicated by Motilal Oswal's Economic Activity Index. The index estimates that private consumption grew at a five-month high pace of 5.6 per cent YoY, driven by auto sales and broad-based expansion of services.

OUR BUSINESS ACTIVITIES

OUR PRODUCT: OPEN END COTTON YARN

Yarn is the end product of spinning. It is the primary component for any Cotton woven or knitted fabric. Cotton yarn is used to make different type of fabrics. In some cases, the cotton yarn is blended with some other yarn in different ratios to provide different effects like shining or to lend more elasticity to the yarn. It is the yarn count and the twisting mode of the yarn that actually determines the overall strength and look of the manufactured fabric.

MANUFACTURING PROCESS

COTTON BALES:

Bales of raw cotton always contain a certain number of impurities termed as 'Trash'. The trash materials are broken seeds, husks, broken leaves, dirt, and short fibers, etc. materials. The amount of trash varies from 1% to 15% depending on the quality of the fibers. The cotton bales are sampled according to lint quality and to ensure yarn homogeneity. They are then opened and cut to make the lint fluffy by passage through bale-openers. The fibre is eliminated from dust, fragmented seeds, stems, plastics, metals and other external elements into Blow Room.

BLOW ROOM:

The blow room is the starting section of a cotton yarn spinning mill. A series of different types of opening, cleaning, and mixing machines are used as per sequence in this section. Mixing or blending is done to get the yarn of desired quality. In blow room, the compacted bales are turned into small flocks and further into as tiny as possible. The opened up and cleaned flocks are transferred into a Carding machine.

CARDING MACHINE:

Carding Machine separates fibres from each other, straightens fibres, removes short fibres and other impurities, converts them into a single continuous fluffy strand called sliver.

BREAKER DRAW FRAMES/DRAWING FRAMES:

The sliver (Carded) is passed through breaker draw frames and Lap former, wherein all the different-different slivers made from different-different bales are aligned, homogenised into a desired uniform quality and converted into sheet rolls of sliver of specific length and width.

These Lapped slivers are then passed through finisher draw frame where quality and length of fibres in sliver can be monitored and managed with the removal of final impurities from it. These finished slivers are then wound into large canes for easy transportation and storage. The finished sliver is then converted into yarn by rotor spinning machine.

ROTOR SPINNING MACHINE

In rotor spinning machine, yarn gets inserted through feed rollers that unwind the slivers from canes and feed them to fibre opening roller or beater roller. The sliver having uniform length fibres gets beaten by saw teeth roller rotating at 8000-10000 rpm. Due to high rpm, the saw teeth cut the sliver and draw individual fibres from it.

These individual fibres get transported into spinning rotor through converging duct with help of air blower. The converging duct allows fibres to flow into longitudinal positions. These fibres get deposited on the inside surface of conical grooved rotor.

In open-end spinning, the rotor's high rotation (i.e. more than 80,000 rpm) and conical groove provides the twisting force to fibres. The twisting force is generated by the rotation of a rotor and is transmitted by friction to the fibres that make up the tail of the newly-formed yarn. The twisted fibres automatically roll into the groove provided inside rotor. As this twisting tail comes into contact with other fibres, it collects them. Once this process is started, it is self-sustaining, and yarn can then be drawn out of the rotor continuously.

YARN CLEANING AND GRADING

The yarn is transmitted to grading section through take-up rollers for quality check and then it was sent for reeling. These medium to Low quality yarns are suitable for making denim as well as heavy fabrics.

The cotton yarn rolled onto the rollers are then passed through a condensing unit to achieve proper moisture content before packing. This is to impart uniform conditioning and humidification to the cotton yarn so that the quality of the yarn remains even throughout.

Further, our Company has in house Laboratory to test the quality of final product. The Test is carried out to examine different characteristics and physical properties of the cotton yarn such as Count Strength Product (CSP), Hairiness Index, Elongation, etc.

PACKING AND DISPATCH

Cones are normally covered by plastic bags before packing in Gunny bag or in Boxes.

This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:

1. Conservation of Critical Environmental Resources
2. Intra-generational Equity: Livelihood Security for the Poor
3. Inter-generational Equity
4. Integration of Environmental Concerns in Economic and Social Development
5. Efficiency in Environmental Resource Use
6. Environmental Governance
7. Enhancement of resources for Environmental Conservation.

f. PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

(i) Tangible Assets

Property, plant and equipment are stated at historical cost less accumulated depreciation, and accumulated impairment loss, if any. Historical cost comprises of the purchase price including duties and non-refundable taxes, borrowing cost if capitalization criteria are met, directly attributable expenses incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by management and initial estimate of decommissioning, restoring and similar liabilities.

Subsequent costs related to an item of property, plant and equipment are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are recognized in statement of profit and loss during the reporting period when they are incurred.

An item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gains or losses arising from de-recognition are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is de-recognized.

g. DEPRECIATION AND AMORTISATION

Depreciation is calculated using the Written down value method over their estimated useful lives. The estimates of useful lives of tangible assets are as follows:

Class of Assets	Useful life as per schedule II	Useful Life as per Group
Leasehold Improvements	30 years	30 years
Office equipment	5 Years	3 years
Furniture and fixtures	10 years	10 years
Plant and Machinery	15 years	15 years
Vehicles	8 years	8 years

Leasehold improvements are amortised over of the lease or life of the asset whichever is less.

h. INVENTORIES:

Inventories of traded goods are valued at lower of cost and net realizable value. Cost comprises of all costs of purchase and other costs incurred in bringing the inventories to their present location and condition . Cost formula used is FIFO/weighted average basis.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost necessary to make the sale.

i. IMPAIRMENT OF ASSETS:

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations which are prepared separately for each of the Company's cash-generating units to which the individual assets are allocated. These budgets and forecast calculations are generally covering a period of five years. For longer periods, a long term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Company estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

j. RETIREMENT BENEFITS:

(i) Short-term employee benefits

Short term employee benefits are recognised as an expense at the undiscounted amount in the statement of Profit and loss for the year which includes benefits like salary, wages, bonus and are recognised as expenses in the period in which the employee renders the related service

(ii) Post employment benefits:

Defined Contribution Plan

'Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre payment will lead to, for example, a reduction in future payment or a cash refund.

Defined benefit Plans

Unfunded Plan: The Company has a defined benefit plan for Post-employment benefit in the form of Gratuity.

Liability for the above defined benefit plan is provided on the basis of valuation, as at the Balance Sheet date, carried out by an independent actuary. The actuarial method used for measuring the liability is the Projected Unit Credit method.

Accumulated leave, which is expected to be utilised within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

'The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. Dilutive potential equity shares are determined independently for each period.

m. TAXATION:

Tax expense for the year comprising current tax & deferred tax are considered in determining the net profit for the year. Provision is made for current tax and based on tax liability computed in accordance with relevant tax laws applicable to the Company. Deferred tax assets (other than in situation of unabsorbed depreciation and carry forward losses) are recognized only if there is reasonable certainty that they will be realized and are reviewed for the appropriateness of their respective carrying values at each Balance Sheet date. Deferred tax assets, in situation of unabsorbed depreciation and carry forward losses under tax laws are recognised only to the extent that where is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be recognised. Deferred Tax Assets and Deferred Tax Liability are been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liability and where the Deferred Tax Asset and Deferred Tax Liability relate to Income taxes is levied by the same taxation authority.

- A Show Cause Notice ("Notice") under Rule 4(1) of the Securities and Exchange Board of India (Procedure for Holding Inquiry and imposing penalties) Rules, 1995 read with Section 15-I of the Securities and Exchange Board of India Act, 1992 was issued on July 18, 2023, to United Polyfab Gujarat Ltd. (Group Company of the Issuer); Gagan Nirmalkumar Mittal (Director cum Promoter of the Issuer) and other entities and personal as well. As per the Notice an abnormal price rise in the shares of United Polyfab Gujarat Ltd. was observed during the period from June 09, 2020, to February 16, 2021. During this period, price of the scrip increased from ₹6.05 as on June 09, 2020, and touched a high of ₹59.75 on January 28, 2021, and closed at ₹51.80 as on February 16, 2021, i.e., an increase of 756.20%. However, during this period no major price sensitive news / announcements were made by the company which could be attributed to justify significant price rise. Further, during the period August 01, 2021, till November 24, 2021, price increased from ₹8.60 to ₹18.15 i.e., an increase of 111.04%. Accordingly, an investigation was carried out into the trading in the scrip of United Polyfab Gujarat Ltd., and it was found that the modus operandi adopted by the United Polyfab Gujarat Ltd., was to increase its market capitalization to a level required for its migration from NSE's SME Platform 'Emerge' to Main board of the Exchange. To achieve this, the United Polyfab Gujarat Ltd., first came out with bonus issue to fulfil the paid-up capital criteria. Subsequently, the connected entities artificially increased the price of the scrip during the 3-month period (August 01, 2021, to November 24, 2021) in order to fulfil the market capitalization criteria before applying for the migration from SME Platform to the Main Board of NSE. Further, from

investigation it was found that Mr. Gagan Nirmalkumar Mittal was CMD and the only Executive Director of the company during IP. The other directors in the company were in the capacity of non-executive; he looks after day to day operations including manufacturing, management and finance of the company and his functional responsibility involves handling the overall operations of the company including client relationships and without the knowledge of the director(s) especially Gagan Nirmalkumar Mittal, United Polyfab Gujarat Ltd., could not fulfil the criteria for migration from NSE's SME Platform 'Emerge' to the Main Board of the Exchange. In conclusion, it was alleged that Gagan Nirmalkumar Mittal, CMD, was responsible for actions taken on behalf of the United Polyfab Gujarat Ltd., for employing fraudulent scheme to fulfil the criteria for migration of the company from SME Platform 'Emerge' to the Main Board of the Exchange and if the alleged violations, are established, then he will be liable for monetary penalty under Section 15HA of the SEBI Act, 1992. As of now the said matter is pending adjudication.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase

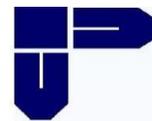

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.
